### Coronavirus - What you need to know

This free online course on the novel coronavirus focuses on the history, symptoms, transmission and prevention of the virus that had not been previously identified in humans. Coronaviruses (CoV) are a large family of viruses that cause illness ranging from the common cold to more severe diseases, such as Middle East Respiratory Syndrome (MERS-CoV) and Severe Acute Respiratory Syndrome (SARS-CoV). Coronaviruses are zoonotic, meaning they are transmitted between animals and people.

### Opioid Crisis

In this free online course you will learn what opioids are, why they are used, and why opioid use (or misuse) is considered to be a crisis. Opioids are a class of drugs that include pain relievers available legally by prescription, such as oxycodone, codeine and morphine; synthetic opioids such as fentanyl; and the illegal drug heroin. Opioids are often used as medicines because they contain chemicals that relax the body and can relieve pain.
